## DETAILED ACTION

### *Allowable Subject Matter*

**Claims 1, 6-8, 10, 15-17(Renumbered 1-8) are allowable.**

The following is an examiner's statement of reasons for allowance: In response to remarks and claim amendments submitted in Applicant's Request for Continued Examination submitted 12/21/2005, and, upon conclusion of a comprehensive search of the pertinent prior art, the Office indicates that the claims, as amended, are allowable.

Regarding claims 1 and 10, patentability exists, at least in part, with an interface connector suitable for coupling the interface circuit board to the midplane circuit board, the interface connector including a first connector half coupled to the interface circuit board and including an interface connector shield and a second connector half coupled to the midplane circuit board; and a gasket disposed between the interface connector shield and the interface module container; wherein the interface connector shield, midplane circuit board, midplane chassis shield and interface module cooperate for providing a low impedance tunnel for channeling high frequency signals to ground.

Aug et al US Patent 5023754, Dara US Patent 4876630, Casanova et al US Patent 5031075, and Rudy Jr. et al US Patent 5348482 are all cited as teaching elements of the claimed invention including a midplane circuit board, a midplane chassis shield disposed adjacent to the midplane circuit board and an interface module including an EMC shield being coupled to a midplane circuit board.

Art Unit: 2841

The cited references, taken alone, or, in combination, do not adequately teach or suggest all the elements of the claimed invention in the manner as claimed by the Applicants.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
